Re: Supply Organic Golden Flaxseed Meal 1kg & 500gm

Dear Valued Distributor,

Stoney Creek Oil Products prides itself on sourcing the finest quality oilseeds to produce the highest quality oilseed products. You should already be aware that we have struggled in recent years to source good quality Australian Organic Flaxseed due to cropping failures beyond anyone's control.

This current season was almost the worst in the history of our company. Unfortunately, our organic grower lost over 97% of their crop due to weather and pest issues. As a result, our supply of Organic Golden Flaxseed has not been replenished for 2016. We will not be able to supply **Organic Golden Flaxseed Meal** in either 1kg or 500gm until December 2016/January 2017. We understand this causes great inconvenience to your company. If

we were able to source high quality Organic Golden Flaxseed from a reliable country, we would. Unfortunately, we have been unsuccessful as it is a rare crop. Please be assured that we will restore this line as soon as the next harvest comes in. Please do not delete it from the lines we have on offer. You will be informed as soon as it is available again.

We are able to source good quality Organic Brown Flaxseed from India and New Zealand. This should keep us in good supply of Organic Brown until the Australian line returns at the end of 2016.

We also have our TassieGold Golden Flaxseed Meal 1kg value pack available for order. This is from high quality conventional flaxseed grown in Tas and will be available all year round.

We apologise for the inconvenience and will keep you informed as we know more.

Kind Regards,

Denise Wilson (Business Manager/Marketing).
